#### **Summary of my Activities and Future Plans**

---

My research interests center the aspects of policy and ethics in the health and medical fields. It is important for me to integrate research with public influence.

I am currently working on several research projects:

\* My postdoctoral research focuses on issues in reproductive ethics, with an emphasis on public funding of Assisted Reproductive Technologies and the concept of the right to procreate re-Israeli policy and the context of fertility treatments in Israel.

\* Another study deals with using Big Data in fertility technologies in an attempt to improve fertilization treatment results.

\* An additional study centers on tracing citizens by the government during the covid-19 pandemic in Israel. This study is carried out jointly with Dr. Shiran Bord and Dr. Carmit Satran.

\* During 2020, I began working with a hospital Intensive Care Unit based on an ethical advisory model I developed together with Dr .Gila Yakov. The work will be accompanied by an evaluation study.
